PROFILE

I am a full-stack developer with over five years of commercial experience working in a team environment. My expertise includes developing applications with Java, Spring Boot, Node.js, React.js, and AWS. I adhere to clean code practices, SOLID principles, and modern Java features (Java 8/11/17). My work spans from backend architecture to responsive frontend design, leveraging industry-standard tools and frameworks.

WORK EXPERIENCE

Senior Software Engineer

Eximia, Lahore | September 2021 – Present

Technologies Used: Java, Spring Boot, Kotlin, GraphQL, PostgreSQL, Docker, AWS, NodeJS, MongoDB, React.js, Redux, Apollo Client, Material UI, OpenAPI, Azure AD, Quartz, Splunk, REST/SOAP, Flowable, MJML, FreeMarker Template (FTL), Java Parser (AST)

- **FastCode Platform (Tools & Accelerators):** Built frameworks and accelerators to **streamline enterprise app development** using Java, Spring Boot, and Angular. Worked on backend services, automation, and integration of multiple developer tools:
 - **API Builder & CodeGen:** Automated generation of Spring Boot + Angular CRUD apps from OpenAPI specs and SQL schemas using FTL and Java Parser (AST)
 - **BPMN & DMN Workflow Tools:** Implemented backend engine to design, import, manage, and execute business processes.
 - **Authentication & Authorization:** Delivered modular auth with JWT, LDAP, and OIDC; fine-grained authorization via Spring Security.
 - **Logging & Exception Handling:** Built modular logging (console, file, Splunk) and centralized error handling with custom ApiError responses.
 - **Email Template Builder:** Designed dynamic HTML email templates with attachments, inline images, and reusable placeholders.
 - **Audit Framework:** Implemented full audit trails (user activity, API requests, entity changes, compliance logging).
 - **Document Management API:** Created secure file upload/download REST APIs.
 - **Job Scheduler:** Added Quartz-based job/trigger scheduling with history tracking.
 - **Notifications API:** Built APIs for Email, SMS, and SSE notifications.
 - **Integration Connectors:** Developed reusable REST/SOAP connectors for external system integrations.
 - **Timesheet App:** Developed a complete timesheet application using fastcode.

- **BookingForm Platform (SaaS)**
 - Developed **v1 individually**, later **led v2** as team lead.
 - Built booking widget with **dynamic pricing engine**, driver/vehicle management, real-time trip tracking, and role-based dashboards.
 - Integrated **Stripe, PayPal, Cash** payments, invoice workflows, and Quartz-based reminders.
 - Added admin dashboard with **analytics, calendar, and customizable themes**.
- **Yumscore (Restaurant Social App)**
 - Built backend APIs with **Kotlin + Spring Boot + GraphQL** and integrate Google maps API to manage restaurant database.
 - Developed **landing website (React + MUI)** and **admin dashboards**.
 - Integrated **AWS (EC2, ECS, S3, SES, RDS, SQS)** for scalability.
- **Other Projects at Eximia**
 - **Leave Management System**: Employee leave workflows (Node.js + React).
 - **Tesia Appointment System**: Scheduling APIs (Spring Boot + PostgreSQL).
 - **Circular-X (Inventory System)**: AI-based product upload integrated with Shopify API.
 - **Cricket Stats Website**: Node.js backend syncing player stats via cron + CricketAPI.
- **Collaboration & Delivery**
 - Worked in **Agile/Scrum** with JIRA, daily standups, sprint planning, retros.
 - Delivered high-quality features via **CI/CD pipelines (GitLab, Docker)**.
 - Partnered with QA/DevOps/Product Owners to improve **sprint velocity and code quality**.

Freelancer

Fiverr, Remote | January 2020 – September 2023

Technologies Used: Java, Kotlin, Spring Boot, Databases, Zoom API, Payment API, AWS

- **iFamily Mobile App**: Architected and delivered a cross-platform mobile app (iOS/Android) using **Ionic 7 + Angular 17** with a **Spring Boot 3 backend**. Implemented an intelligent **role-based family matching algorithm** (iMom, iDad, iBrother, etc.) with location-based discovery, multi-provider authentication (Google, Apple, Facebook, Phone) via **JWT + Firebase Auth**, and **real-time chat** with TalkJS and FCM push notifications. Configured **AWS S3** for media storage, **AWS SES** for email delivery, and built **multi-language support** (English/Spanish).
- **Nsoroma Tracking System**: Developed real-time tracking features using Java, Spring Boot, and Angular.
- **Employee Attendance System (Sana Cash & Carry)**: Developed a secure, scalable backend with Kotlin and Spring Boot.
- **Online Language Learning Platform (ayncode)**: Built a backend system integrating REST APIs and Zoom Meeting API.
- **Social Media Jobs Posting App (myklad)**: Created a backend for user profiles, job posting, and recruiter functionalities.
- **SWR-EPG-2-ARD-POC (Innotrade)**: Integrated third-party systems using Java and Maven.

Teaching Assistant

University of Management & Technology, Lahore | April 2020 – July 2021

Technologies Used: Java, C++, MySQL

- Assisted students in Java and C++ programming courses.
- Supported database management projects using MySQL.
- Guided term projects related to software engineering.

EDUCATION

- **Bachelor's in Software Engineering** (CGPA: 3.59/4.00)
University of Management & Technology, Lahore (2017 - 2021)
- **Intermediate in Pre-engineering** (Score: 837/1100)
Muslim College Lar, Multan (2015 - 2017)
- **Matric in Science** (Score: 767/1100)
Govt. High School, Ayazabad, Multan (2013 - 2015)

SKILLS

- **Languages:** Java, Kotlin, JavaScript, Typescript
- **Backend Frameworks:** Spring Boot, Node.js, Hibernate
- **Frontend Frameworks:** React.js, Redux, Material UI, API integrations
- **Mobile App Frameworks:** Flutter, Angular Ionic, API integrations
- **APIs:** REST, GraphQL, Google Maps API, Payment AP, Shopify API.
- **Databases:** PostgreSQL, MySQL, MongoDB.
- **Cloud Platforms:** AWS, DigitalOcean, Docker.
- **Tools:** Maven, Gradle, GitLab CI/CD.
- **Artificial Intelligence:** ChatGPT (OpenAI), Anthropic's Claude 3 Sonnet model.

CERTIFICATIONS

- **DevOps on AWS: Code, Build, and Test** | Coursera (Aug 2022)
- **Building Modern Java Applications on AWS** | Coursera (Sep 2022)
- **AWS Cloud Technical Essentials** | Coursera (Aug 2022)
- **Java Programming: Principles of Software Design** | Coursera (Oct 2022)

ACHIEVEMENTS

- Graduated with honors in Software Engineering.
- Best Employee of the Month at Eximia.
- Top Rated Seller at Fiverr.
- Successfully delivered multiple scalable software solutions.
